19/04/2023	44	0	10	5	6.5 - 8.5	8.19	50	7	25	3.7	Baseline Sampling (no discharge)

Legend

Values identified in red represent results exceeding criteria requiring notification to the NSW EPA as a pollution incident (for discharge only).

Values shaded green are compliant with criteria

Values shaded grey represent results exceeding criteria recorded under conditions where criteria are not applicable, i.e. TSS concentration > 50 mg/L following rainfall exceeding 44 mm in five days.
