REGIONAL GROUP AUSTRALIA

Preferred supplier of integrated quarry and construction material solutions.

Regional Group Australia provides construction material inputs along the east coast of Australia, servicing major infrastructure and development projects with a full-service solution that includes quarry product, crushing and screening and transport operations.

This integrated model means that customers benefit from cost effective and efficient outcomes, as well as ensured quality control standards across the construction materials supply chain.

Supply Chain Process

Regional Group Australia have built an outstanding reputation for delivering quality product, service and advice and is a trusted supplier for clients including state government departments and agencies, local councils and private developers and contractors.

Our team is comprised of engineers and designers who can design, build, and manage every aspect of your product—from raw materials management to the completion of finished goods ready to operate in the harshest of conditions. We offer full engineering, design and operational planning services. Our team also actively competes in the procurement of solutions for our clients for complete build or partial toll requests.

MAAS

REGIONAL GROUP AUSTRALIA IS PROUDLY A PART OF MAAS GROUP HOLDINGS.

Delivering market leading property, construction and infrastructure solutions.

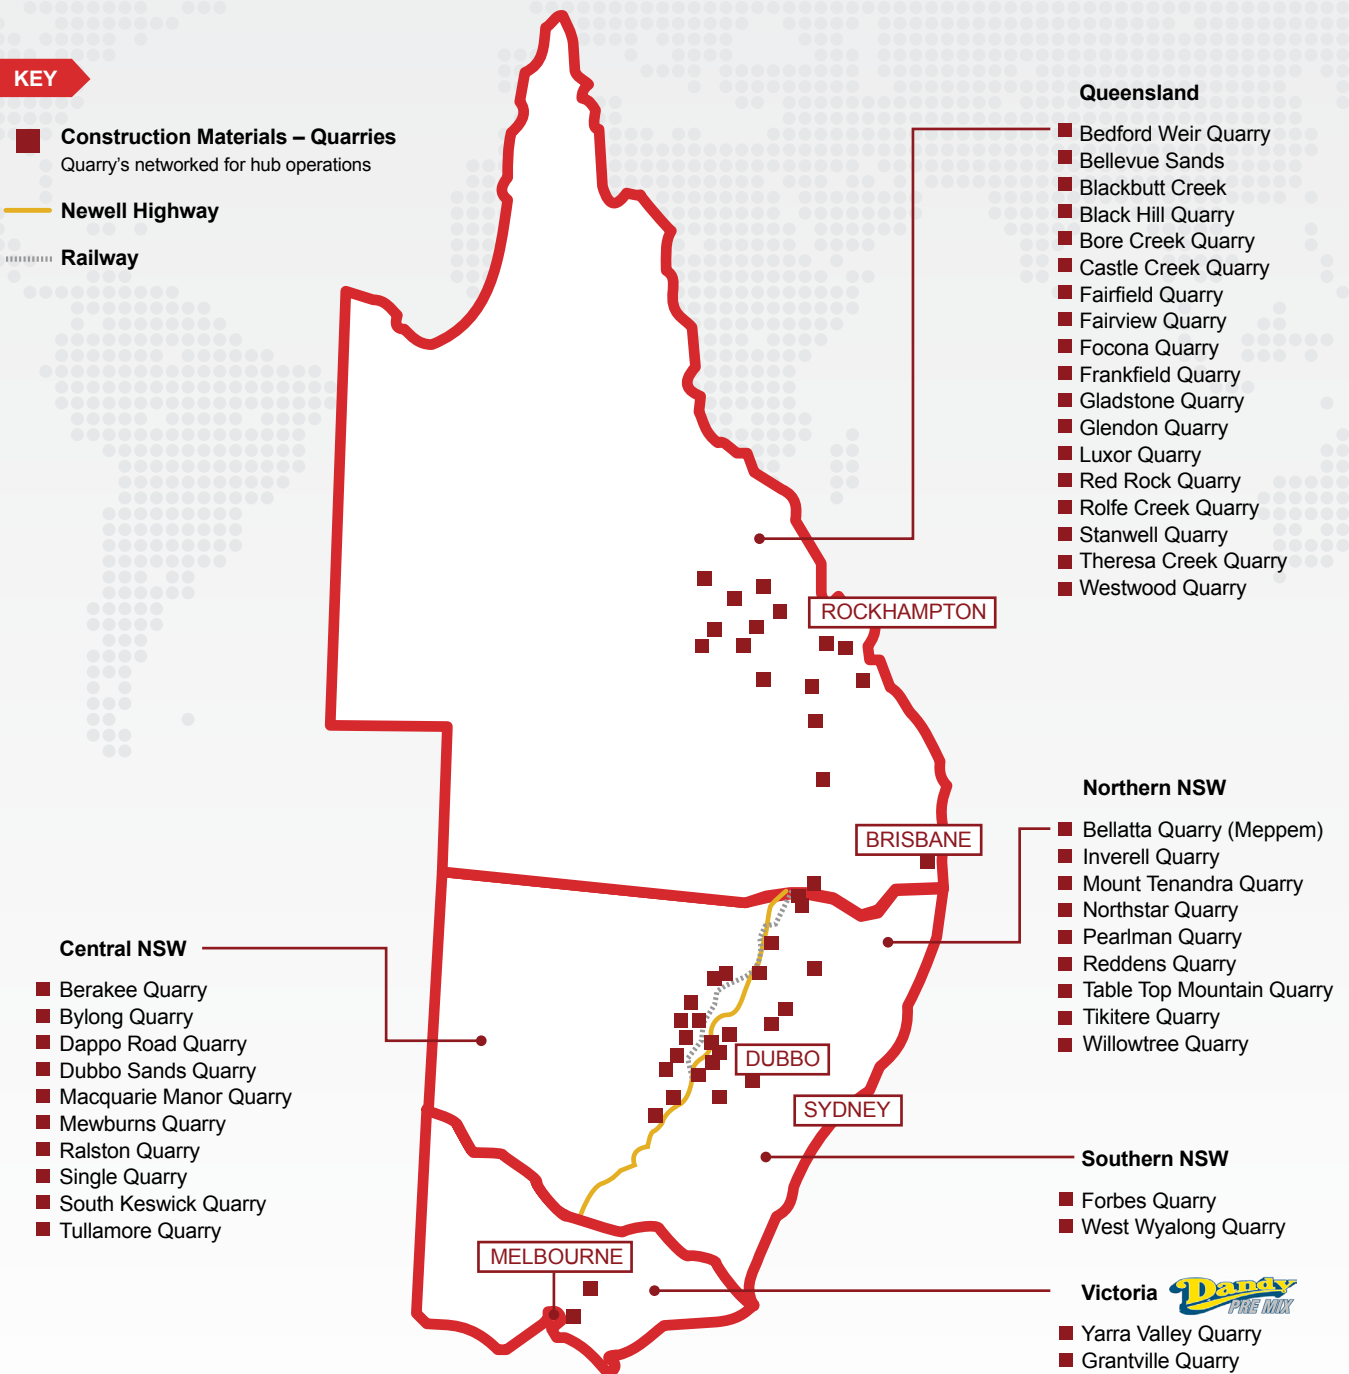

Maas is an ASX-listed Australian construction materials, equipment and services provider with diversified exposure across the property, civil, infrastructure and mining sectors.

Since its founding in 2002, Maas has built a strong market position in all its key business units – Construction Materials, Civil Construction and Hire, Real Estate and Manufacturing and Sales.

Maas is committed to delivering a superior level of service while maintaining an uncompromising focus on safety, quality, and value.

REGIONAL QUARRIES

Our quarries are strategically located along the east coast of Australia, stretching from Rockhampton in Central QLD to Victoria. Our product reach is among the most expansive in regional Australia. The locations of our quarries means that we can service major infrastructure projects including Inland Rail, the Newell Highway upgrade, and Renewable Energy Zones. Our clients are ensured a trusted quarry product supplier that can service extended projects across their lifecycle.

REGIONAL TRANSPORT

We create efficiencies for our clients by offering a fully integrated supply chain, which includes providing safe and reliable transport solutions directly to site. Clients benefit from reliable and fast delivery times, and direct access to product. By removing the transport middleman, we can ensure cost and time efficiencies.

Our modern fleet of PBS rated truck and dogs, and our experienced team of drivers, deliver all quantities of construction material direct from our quarries to our client's project site. Regional Transport prides itself on delivering safely and on time, every time.

QUALITY

At Regional Group Australia, quality is embedded into everything we do. From the source rock in our quarries, the processing equipment that we use, our stockpile management and NATA Accredited testing through to our transport and customer service, we strive to provide our customers with high quality products and services to make your projects easier.

Our management team has extensive experience in both operational excellence and quality management. It is our commitment to quality that has seen us supply our superior products to some of the largest infrastructure projects in Regional NSW such as

the Newell Highway upgrades, the Parkes Special Activation Precinct, and Inland Rail.

Our dedication to quality is reinforced through our partnership with one of the leading NATA Accredited testing laboratories in Regional NSW, Macquarie Geotech, which allows us to continuously demonstrate our compliance with our customers' project requirements.

Both our quarry materials and our concrete products are produced to comply with various specifications such as local council, Transport for NSW and Australian Standards. Whatever the job, at Regional we are committed to providing the best products for your project.

HEALTH & SAFETY

We care about our people. And we believe that all workers should return home safely at the end of the day.

That belief drives a strong commitment to the health, safety and wellbeing of our workers—and it's supported by robust work health and safety management systems. Our consultative risk management framework aims to deliver a targeted risk-based approach, engaged leaders, empowered workers and a positive safety culture.

MAAS SAFETY SLOGAN

Our Group Safety Slogan outlines the behaviours we commit to and unifies us as a team. It focuses everyone on the same safe behaviours and sets the business' expectations.

ENVIRONMENT

We're committed to managing our footprint and minimising any impact on the environment whilst making a positive contribution to nature and society. We promote our commitment through training and integration into business processes.

Responsible environmental management is a fundamental part of our corporate responsibility and integral to our long-term success.

Our environmental management systems ensure environmental obligations are identified and management strategies implemented across our operations, from planning through to operational stages.

We believe in sound governance and acting with integrity in all our dealings, meeting the needs of our customers, looking after our team, taking care of the environment, and supporting the communities where we operate. We conduct an environmental and social impact study (ESIA) when selecting greenfield sites or developing major modification projects on existing sites.

South Keswick Quarry, Dubbo

TEAM

WES MAAS

CEO and Managing Director

Maas Group

Wes founded Maas Group in 2002 with one Bob cat and a tipper truck. Since then, he has grown the business into a diversified and integrated construction materials, civil construction and hire, real estate and manufacturing business, now listed on the ASX. Wes remains in the business and is supported by an experienced executive leadership team, who endeavour to continue the businesses successful growth.

RICHARD TOMKINS

General Manager

Regional Group Australia

Richard brings his over 20 year experience in the construction material industry to Regional Group. In his current role, Richard specialises in the delivery of large scale construction material projects, supporting operational performance and excellence in customer experience.

ANDREW APOLONY

Operations Manager
Regional Group Australia

Andrew was a founding member of Regional Group Australia and has played a key role in the business's

growth in both the quarry products and services and development of the mobile crushing fleet. Andrew enjoys being on the ground, and can often be found at one of the quarries working with the broader team to service clients.

GRAHAM LAVERTY

QLD Area Manager
Regional Group Australia

Graham brings an extensive career history - After completing his apprenticeship at age 20, Graham

worked his way up to management level in construction. Moving into quarrying, Graham has managed and operated quarries in Central Queensland for the past decade, building the operations from a single quarry to multiple sites. In his role, Graham brings his experience into ensuring optimal operational performance and client satisfaction.

JOSHUA KENTWELL

General Manager, Transport & Logistics
Regional Group Australia

Joshua has over 14 years'

experience in the oil and gas sector, managing large scale warehouse and logistics portfolios. Having joined Regional Group Australia in June 2022, Joshua will apply his deep knowledge of transport and logistics to support our Regional Transport and Logistics capability nationally to achieve operational and service excellence.

STEFANO PANAGIOTOU

QLD Area Manager
Regional Group Australia

Stefano has over 10 years' of Australian and international experience in the

concrete and quarrying industries. Stefano has extensive experience with large scale infrastructure projects such as wind farms, solar farms, bridgeworks, road construction and hydro. With previous experience in Technical/Quality and Performance Improvement roles, his focus is to support our customer's needs and drive continuous improvement throughout our business.
